CONTENTS OF VOLUME 53

NUMBER 1—JANUARY

PAGE

Hierarchical integrated identification and optimization approach for on-line stochastic optimizing control of large-scale steady-state industrial processes. J. LIN, P. D. ROBERTS, M. WANG and B. W. WAN 1

H^{∞}-control of a distributed parameter system with non-minimum phase. J. P. GAUTHIER and C. A. XU 45

Robust linear quadratic optimal control for systems with linear uncertainties. SHUH-CHUAN TSAY, I-KONG FONG and TE-SON KUO 81

New method for predictive controller design for bilinear systems. EN-BO FENG, JIN-SHOU YU and WEI-SUN JIANG 97

Discrete-time control of continuous-time non-linear systems. W. T. BAUMANN 113

Model reduction of linear discrete systems via weighted impulse response gramians. V. SREERAM and P. AGATHOKLIS 129

Modification of adaptive control laws using adaptive gain feedback. P. T. KIDD 145

Choice of discontinuous control component for robust sliding mode perfomance. S. K. SPURGEON 163

State-space model identification with data correlation. DAQING HOU and CHIN SHUNG HSU 181

Indirect techniques for adaptive input-output linearization of non-linear systems. A. TEEL, R. KADIYALA, P. KOKOTOVIC and S. SASTRY ... 193

Irreducible model estimation for MIMO systems. S. MUKHOPADHYAY, A. PATRA and G. P. RAO 223

NUMBER 2—FEBRUARY

Invited paper—Survey of quantitative feedback theory. I. HOROWITZ 255

Adaptive controller for wing flutter with unmeasurable excitations and unmodelled dynamics. R. LIVNEH and G. L. SLATTER 293

Output predictive adaptive control of a single-link flexible arm. S. CETINKUNT and SIJUN WU 311

Stable adaptive control for not-necessarily stable discrete linear plants with bounded non-linear inputs. M. DE LA SEN, A. MARTÍNEZ-ESNAOLA and I. OBIETA 335

Approximation of delay systems—a case study. C. GLADER, G. HÖGNÄS, P. M. MÄKILÄ and H. T. TOIVONEN 369

Recursive identification algorithms for continuous systems using an adaptive procedure. SETSUO SAGARA, ZI-JIANG YANG and KIYOSHI WADA 391

Internal models in regulation, stabilization, and tracking. O. R. GONZÁLEZ and P. J. ANTSAKLIS 411

PAGE

Computation of the inverse of a polynomial matrix and evaluation of its Laurent expansion. G. FRAGULIS, B. G. MERTZIOS and A. I. G. VARDULAKIS 431

Bias-compensating least squares method for identification of continuous-time systems from samples data. ZHEN-YU ZHAO, SETSUO SAGARA and KIYOSHI WADA 445

Generalization and comparison of two recent frequency-domain stability robustness results. A. KATBAB and E. I. JURY 463

Computing transfer function zeros of a state space system. D. WESTREICH 477

Constant solutions of polynomial equations. V. KUČERA and P. ZAGALAK 495

Correspondence

A note on efficient smoothing for boundary value models. H. L. WEINERT 503

NUMBER 3—MARCH

Causal eigenvector function approximations and the problem of scaling: an algorithm. J. A. ROSSITER and B. KOUVARITAKIS 509

Criterion for loop stability in MIMO feedback systems having an uncertain plant. O. YANIV and B. SCHWARTZ 527

Design of stabilizing control laws for smooth non-linear systems. H. MICHALSKA and D. Q. MAYNE 541

Robust adaptive control of plants with unknown order and high frequency gain. GANG TAO and P. A. IOANNOU 559

Use of disturbance measurement feedforward in LQG self-tuners. M. STERNAD 579

Adaptive modal parameters identification for collocated position feedback vibration control. C. J. GOH and T. H. LEE 597

Partial-fraction expansion in system analysis. J. LEYVA-RAMOS 619

Polynomial solution of the continuous-time GMV control problem. A. CASAVOLA 641

Inner and outer geometry for singular systems with computation of subspaces. G. BEAUCHAMP, A. BANASZUK, M. KOCIĘCKI, and F. L. LEWIS 661

Laguerre methods and H^∞ identification of continuous-time systems. P. M. MÄKILÄ 689

Model order reduction via real Schur-form decomposition. R. W. ALDHAHERI 709

Stability of the pseudo-inverse method for reconfigurable control systems. ZHIQIANG GAO and P. J. ANTSAKLIS 717

Linear dynamics hidden by input–output linearization. L. R. HUNT and M. S. VERMA 731

Correspondence

Generalized dither. S. LEE and S. M. MEERKOV 741

NUMBER 4—APRIL

PAGE

Announcement/Editorial 749

On-line evaluation of auto-tuning optimal PID controller on micromachine system. Q. H. WU and B. W. HOGG 751

Uncertain SISO systems with fixed stable minimum-phase controllers: relationship of closed-loop systems to plant RHP poles and zeros. W. E. LEITHEAD and J. O'REILLY 771

State feedback, confinement and stabilization for non-linear continuous-time systems. J. HAMMER 799

Sequential quadratic programming algorithm for discrete optimal control problems with control inequality constraints. J. F. A. DE O. PANTOJA and D. Q. MAYNE 823

Maximal range for generalized stability—application to physically motivated examples. L. SAYDY, A. L. TITS and E. H. ABED 837

Walsh function analysis of linear and bilinear discrete time systems. F. L. LEWIS and D. W. FOUNTAIN 847

Existence and structure of minimum-time control for multiple robot arms handling a common object. YAOBIN CHEN 855

Describing functions, Volterra series, and the analysis of non-linear systems in the frequency domain. J. C. PEYTON JONES and S. A. BILLINGS 871

Optimal pumping strategy for groundwater decontamination. C. MERCKX. 889

Simple robust stability tests for polynomials with real parameter uncertainty. T. E. DJAFERIS 907

Root regions of bounded coefficient polynomials. N. KARCANIAS and X. Y. SHAN 929

Simple pivoting algorithm for root-locus method of linear systems with delay. K. NISHIOKA, N. ADACHI and K. TAKEUCHI 951

Robust stability of control systems with polytopical uncertainty: a Nyquist approach. F. J. KRAUS and W. TRUÖL 967

Sliding-mode control for singularly perturbed systems. B. S. HECK 985

NUMBER 5—MAY

Announcement/Editorial 1003

Practical issues in multirate output controllers. MENG-JOO ER and B. D. O. ANDERSON 1005

Some issues on the practical use of recursive least squares identification in self-tuning control. O. P. MALIK, G. S. HOPE and S. J. CHENG 1021

Interaction modelling approach to distributed control with application to power systems. M. ALDEEN 1035

Application of equilibrium surface modelling methodology in designing a controller for a Van der Pol oscillator. B. WIGDOROWITZ and I. M. MACLEOD 1055

PAGE

Theory of LTR for non-minimum phase systems, recoverable target loops, and recovery in a subspace. Part 1: Analysis. A. SABERI, B. M. CHEN and P. SANNUTI 1067

Theory of LTR for non-minimum phase systems, recoverable target loops, and recovery in a subspace. Part 2: Design. A. SABERI, B. M. CHEN and P. SANNUTI 1117

Mixed L_2 and L_∞ problems by weight selection in quadratic optimal control. G. ZHU and R. SKELTON 1161

Loop transfer recovery for general observer architectures. H. H. NIEMANN, P. SØGAARD-ANDERSEN and J. STOUSTRUP 1177

Computer-aided-design tool for simplification of robot dynamic model based on manipulator system performance. PO-RONG CHANG 1205

A time invariant approach to multirate optimal regulator design. I. S. APOSTOLAKIS and D. JORDAN 1233

Correspondence

Comments on 'New algorithm for minimal balanced realization of transfer function matrix'. SIU-KEI TIN, J. LAM and D. HO 1255

Correction to 'Analysis and design of ill-conditioned plants. Part 2: Directionally uniform weightings and an example' and 'Plant directionality, coupling, and multivariable loopshaping'. J. CHEN and J. S. FREUDENBERG 1261

NUMBER 6—JUNE

Tutorial paper—Robust performance specifications for uncertain stable SISO systems. D. R. LEWIN 1263

Robust design of MIMO feedback systems having an uncertain non-linear plant. O. YANIV 1283

Generalized Nyquist bands for structured and highly structured uncertainty. B. KOUVARITAKIS, J. A. ROSSITER and J. WANG 1295

Computing stochastic continuous-time models from ARMA models. T. SÖDERSTRÖM 1311

Novel approach to model reference adaptive control. CHIANG-CHENG CHIANG 1327

Some results on the problems of decentralized reliable stabilization. CHIA-CHI CHU and FAN-REN CHANG 1343

New approach to robust model reference adaptive control for a class of plants. LI-CHEN FU 1359

Stable hybrid adaptive control. CISHEN ZHANG, R. H. MIDDLETON and R. J. EVANS 1377

Mixed coordination method for long-horizon optimal control problems. JIANXIN TANG, P. B. LUH and TSU-SHUAN CHANG 1395

Eigenstructure assignment by output feedback. B. A. WHITE 1413

PAGE

Identification of linear systems using input–output cumulants. YUJIRO INOUYE and HIRONOBU TSUCHIYA 1431

Spectral analysis in linear process identification—a new look at an old problem. Y. C. ZHU and M. H. KLOMPSTRA 1449

Feedforward into local loops of plant modifying cascaded feedback systems. E. EITELBERG 1467

A note on the closed-form determination of the gramians of a stable time-invariant linear system. L. A. GONZALEZ and N. MUNRO 1483

Correspondence

Controllability analysis via orthogonal functions. X. DING and P. M. FRANK 1491

Comments on 'Algorithm for simultaneous stabilization of single-input systems via dynamic feedback'. QING-GUO WANG 1497
